Experience

Innovative AI Solutions Engineer with a 4-year background in building and scaling Generative AI applications using LangChain and Amazon Bedrock. Expert in designing RAG architectures, autonomous agents, and secure LLM pipelines featuring PII masking and Bedrock Guardrails. Strong foundation in Cloud-native deployment and API integration, focused on transforming raw data into production-ready AI services.

GenAI Engineer

GenAI Consultant | Chicago, Illinois

- Engineered modular predictive services using Python and Flask, implementing Object-Oriented Programming (OOP) for scalable wine-quality and intent classification models.
- Automated experiment tracking and model versioning via MLflow and DVC, utilizing AWS S3 as a remote backend for data reproducibility.
- Optimized development cycles by containerizing applications with Docker and managing collaborative codebases through advanced Git/GitHub branching strategies.

AI & LLM Solutions Engineer | Bank of America | New York

- Developed sophisticated **Generative AI** workflows using **LangChain** and **Amazon Bedrock**, focusing on RAG applications and autonomous agents with built-in memory.
- Deployed high-availability inference endpoints on **Kubernetes (Kind cluster)** using **KServe** and **SageMaker** to support enterprise-level model serving.
- Built secure AI agents for automated ticket summarization and PII masking, integrating **Bedrock Guardrails** to ensure ethical and compliant foundation model outputs.

Skills

Generative AI & LLMs: LangChain, Amazon Bedrock, RAG (Retrieval-Augmented Generation), Prompt Engineering, Foundation Model Fine-tuning, Bedrock Guardrails, AI Agents.

MLOps & DevOps: MLflow (Tracking & Registry), DVC (Data Version Control), Docker (Containerization), Kubernetes (Kind Clusters), KServe (Inference Serving), Git/GitHub.

Cloud Platforms (AWS): Amazon SageMaker (Model Registry & Deployment), AWS Lambda, Amazon S3, AWS AI Services.

Programming & Frameworks: Python (OOP, NumPy, Pandas), Flask API Development, HTML Integration, RESTful APIs.

Tools & IDEs: VS Code, Anaconda, Git CLI, Linux/Bash Scripting.

Education

MAY 20XX

Computer science engineer, MLOps Engineering Certification | [Institution/Platform] | Online

9.0 GPA • Focused on End-to-End Machine Learning Pipelines, AWS Cloud, and GenAI

Activities

Literature • Environmental conservation • Art • Yoga • Skiing • Travel
